

PROPOSED RESOLUTION ON NETWORKS

This is offered as an amendment to the draft Organizational Priorities Resolution. It mainly restates the relevant portions of the last OPR.

Add new Section 6, renumber all following sections:

"The NPC, working with DSA members across the country, shall encourage the development of networks of individuals involved with various types of movement work. Efforts will be made to establish electoral, anti-war, and labor networks, as well as other areas in which need and interest are demonstrated. To the degree these networks take off, they should be institutionalized as commissions. The general purposes of networks and commissions are as follows:

- i. Bringing DSA's political analysis to those working in the relevant movements;
- ii. Keeping participants and others informed of significant developments in other movements; and
- iii. Encouraging movements to pursue their goals in ways that support the work of other movements and challenge corporate domination of the economy, society, and politics."

Amend current Section 6, new Section 7, by adding at the end of the first paragraph, after "activist roles in DSA locals":

"and networks."

Respectfully submitted,

Eric A. Ebel
